COURSE NUMBER
5335

TEAM MEMBERS:

Deshmukh, Ashwini Sandesh
Donapati, Bhavana Reddy
Gaddam, Chethan
Konuru, Venkata Siva Kishore
Somu, Parvathi Aishwarya
Vinjamoori, Srilekha Tirumala

PART 1:

1. Identify the entities in the UFO application. List each entity with a short definition. Note you need to underline the attribute used as the primary key.

Ans: The entities with their attributes, business rules to describe relationship among entities and the supertype-subtype relationships are as follows:

- **Customer** (Customer_account_number, Customer_Name, Billing_Address,Contact)
- **Orders** (Order_Number, Delivery_Address, Customer_account_number)
- **Furniture** (Item_Code, Description, Unit_Price, Quantity_in_Stock)
- **Truck** (Vehicle_Number,Lic_Plate_Number, Lic_Exp_Date, Inspection_Exp_Date, SSN)
- **Employee** (SSN, Emp_Name, Emp_Address, Phone, Salary, Emp_Type)
- **Driver** (SSN, Driver_License, DL_Exp_Date)
- **Sales_Reps** (SSN,Commission,Order_number)
- **Shipment** (Shipment_ID,Vehicle_number,Order_number)

2. Write business rules to describe the relationship among these entities:

- Each **Customer** can place one or more **Orders**.
- Each **Order** is placed by one **Customer**.
- Each **Order** can have one or more **Order_Items**.
- Each **Order_item** is for one **Order**.
- Each **Order** can be included in one or more **Shipments**.
- Each **Shipment** is for one **Order**.
- Each **Shipment** is assigned to one **Truck**.
- Each **Truck** can carry one or more **Shipments**.
- Each **Truck** is assigned to one **Driver**.
- Each **Driver** is be assigned to one **Truck**.
- Each **Furniture** can be included in zero or many **Order_Items**.
- Each **Sales_reps** can take one or many **Orders**.
- Each **Order** is taken by one **Sales_reps**

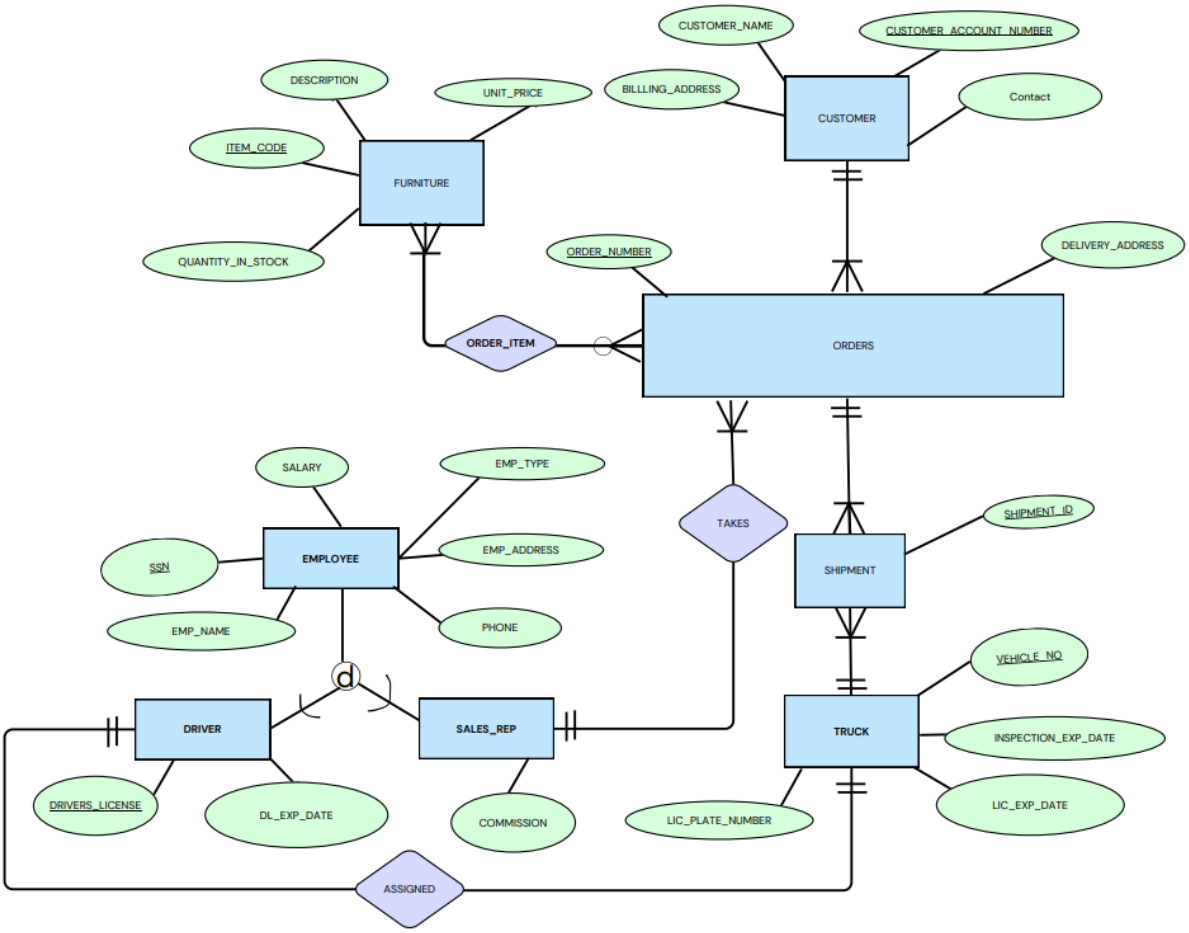
3. Describe supertype-subtype relationships as:

- Driver is a type of Employee.
- Sales_reps is a type of Employee.

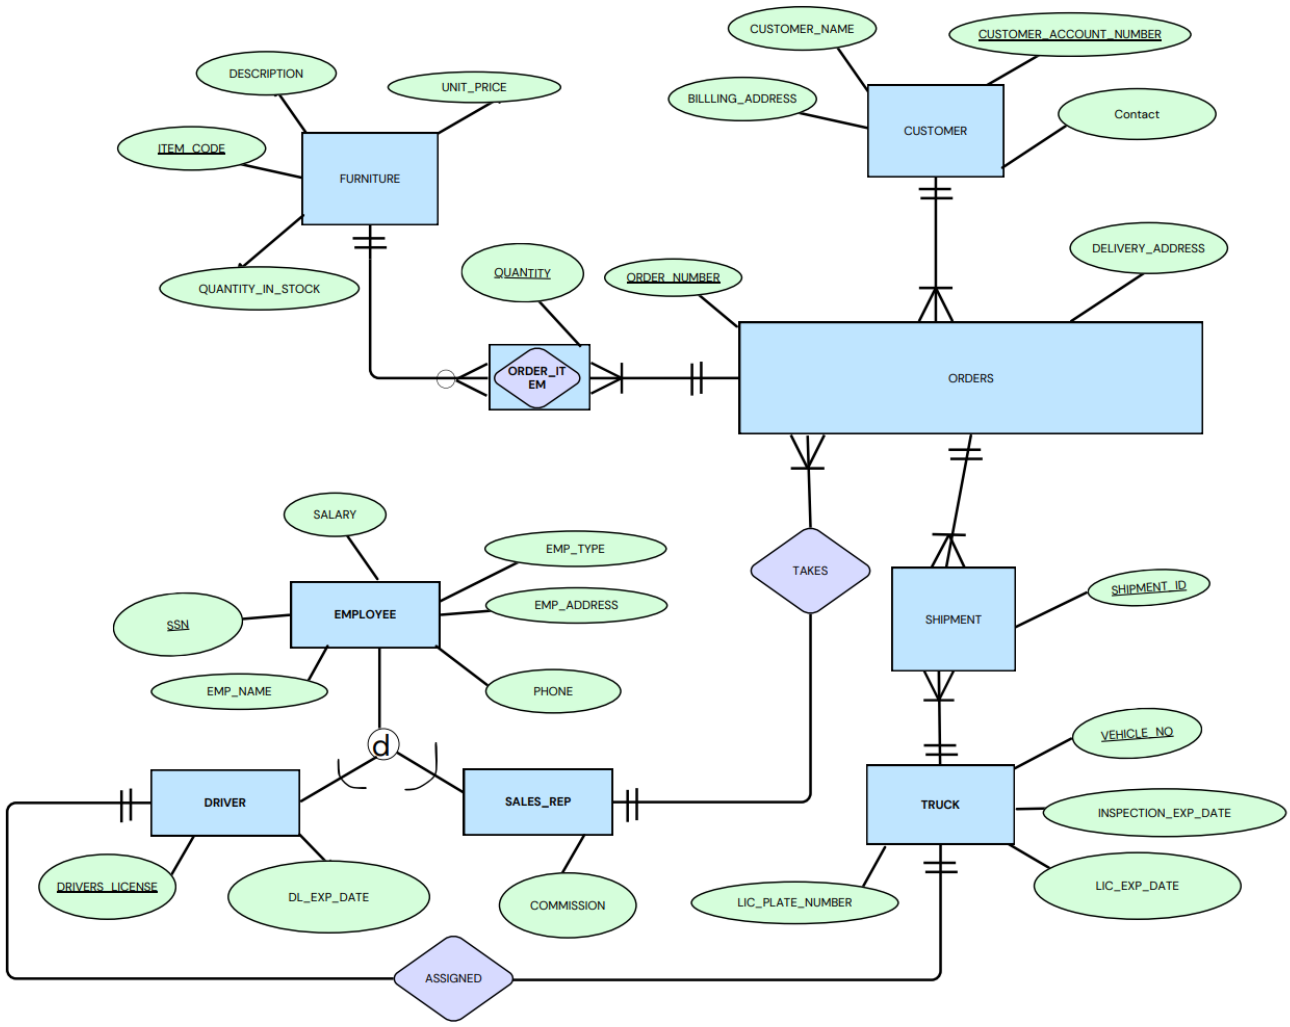
PART 2:

A. Create two E-R diagrams for the information system using Crow's foot notation. One diagram should show all entities and relationships including many-to-many relationships. The second diagram will include all the entities in the first diagram. In addition, it will have associative entities that replace many-to-many relationships.

Ans: The below is the ER Diagram including many-to-many relationships using Crow's foot notation.

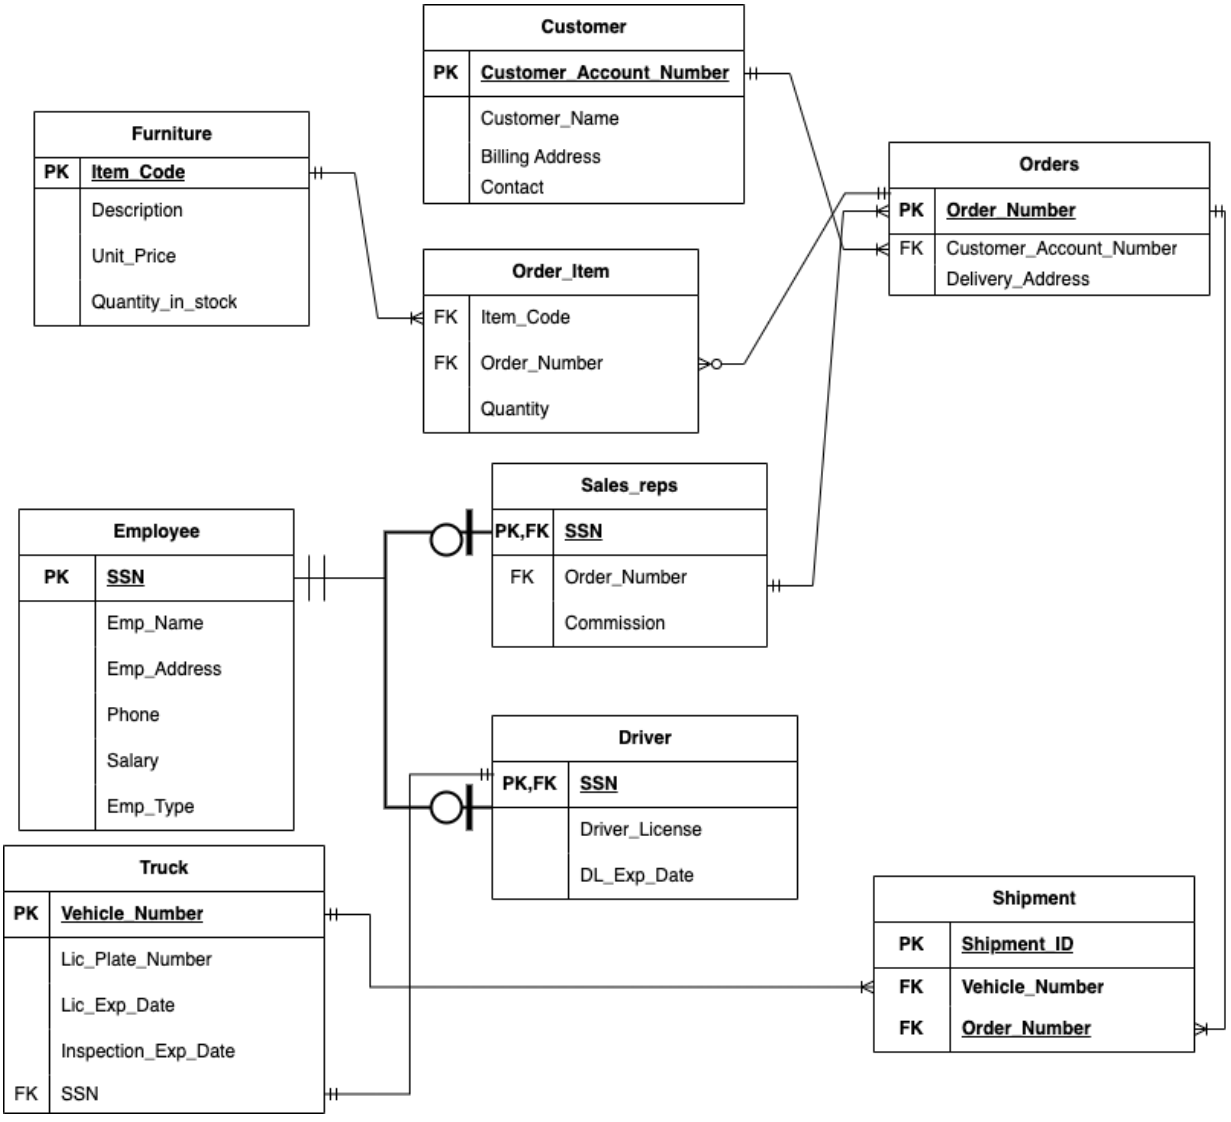


Ans: The ER diagram below is including the associative entities.



B. Create a relational schema for your database in third normal form. Describe your schema using the following format. Note that primary keys and foreign keys should be denoted (i.e., having **pk**, **fk** before the attribute names) and underlined. If an attribute is both a primary key and a foreign key, put both pk and fk before it.

Ans: The diagram below is the relationship schema presented in the third normal form. Both primary keys and foreign keys are mentioned.



C. Create a data dictionary for your database using the format described in Table 3.6 in Coronel & Morris (pp. 88, 13th Ed.). Make reasonable assumptions about data types and sizes for different attributes. **You must specify the schema name (the userid of the account in which the tables are created) in the data dictionary**.

The schema name (user_id) used to execute the project is: **sxt4911**

TABLE NAME	ATTRIBUTE NAME	CONTENTS	TYPE	FORMAT	RANGE	REQUIRED	PK OR FK	FK REFERENCED TABLE

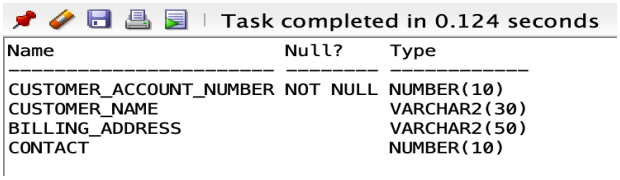
NUMBER	NUMERIC DATA. NUMBER(9,2)

D. Create Tables in Oracle to implement the UFO database. This must be done in your UTA Oracle account so that I can verify your implementation. Enter about 5-8 rows in each table. **To document this part in your report, use the Describe command to list the schema of each table followed by the Select command to list its content. Grant Select to your instructor and the TA on all tables.**

Ans: The following attached outputs are for the "Describe" command to list the schema for each table and "Select" command to list the table content.

- **CUSTOMER TABLE:**

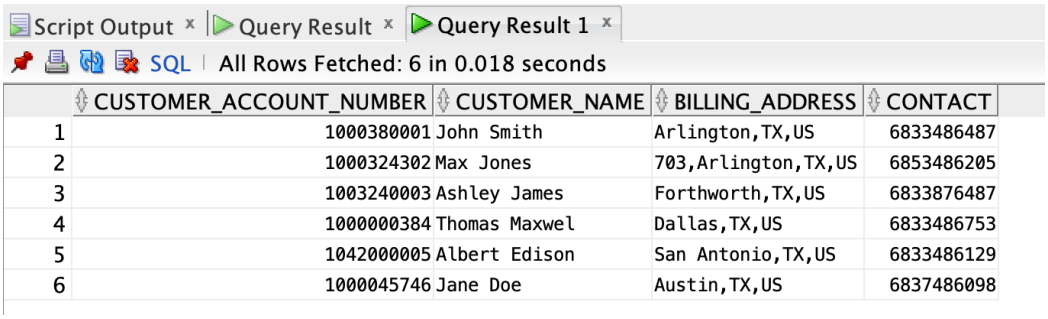
Describe Customer;



Task completed in 0.124 seconds

```
Name                    Null?    Type
----------------------- -------- ------------
CUSTOMER_ACCOUNT_NUMBER NOT NULL NUMBER(10)
CUSTOMER_NAME                    VARCHAR2(30)
BILLING_ADDRESS                  VARCHAR2(50)
CONTACT                          NUMBER(10)
```

SELECT * FROM Customer;



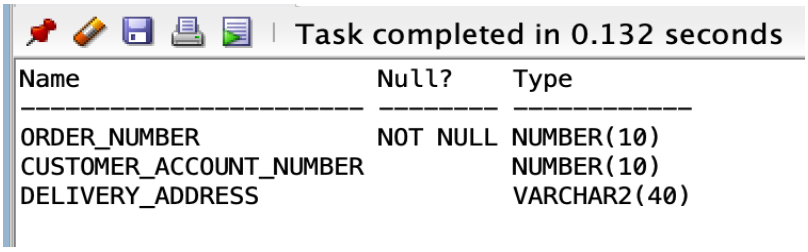
Script Output | Query Result | Query Result 1

SQL | All Rows Fetched: 6 in 0.018 seconds

	CUSTOMER_ACCOUNT_NUMBER	CUSTOMER_NAME	BILLING_ADDRESS	CONTACT
1	1000380001	John Smith	Arlington,TX,US	6833486487
2	1000324302	Max Jones	703,Arlington,TX,US	6853486205
3	1003240003	Ashley James	Forthworth,TX,US	6833876487
4	1000000384	Thomas Maxwel	Dallas,TX,US	6833486753
5	1042000005	Albert Edison	San Antonio,TX,US	6833486129
6	1000045746	Jane Doe	Austin,TX,US	6837486098

- **ORDERS TABLE**

Describe Orders;



Task completed in 0.132 seconds

```
Name                    Null?    Type
----------------------- -------- ------------
ORDER_NUMBER            NOT NULL NUMBER(10)
CUSTOMER_ACCOUNT_NUMBER          NUMBER(10)
DELIVERY_ADDRESS                 VARCHAR2(40)
```

SELECT * FROM Orders;

Script Output | Query Result

SQL | All Rows Fetched: 6 in 0.025 seconds

	ORDER_NUMBER	CUSTOMER_ACCOUNT_NUMBER	DELIVERY_ADDRESS
1	451	1000380001	(null)
2	452	1000324302	(null)
3	453	1003240003	(null)

Peer Evaluation Form

Please evaluate each of your team members on the following items using a 10 point scale. A score of 10 indicates best performance and a score of 1 indicates worst performance. After evaluating your teammates, evaluate yourself on each of the item.

Underline or highlight your name.

Item #	Task
1	Performed assigned tasks correctly
2	Performed assigned tasks in a timely manner
3	Was able to work independently on assigned tasks
4	Readily accepted responsibility
5	Provided positive, creative input
6	Interacted well with other members of the group
7	Total points - Please calculate and list
